Introducing the Exercise and Sports Science Department:

Full Time Faculty

Danielle Wigmore, Ph.D., Department Chair
dwigmor1@fitchburgstate.edu
Office: 155 North Street, Room #100A; Extension 3250
Teaches: Exercise Physiology I; Exercise Physiology II; Cardiovascular and Electrophysiology; Topics: Wellness in Today’s World, Exercise, Nutrition and Heart Disease; Health and Fitness

Jessica Alsup, Ph.D.
jalsup@fitchburgstate.edu
Office: 155 North Street, Room #109; Extension 3673
Teaches: Exercise Response and Adaptations in Special Populations; Exercise Physiology II; Intro to Exercise Science; Human Motor Development; Applied Nutrition; Health and Fitness

Jeff Godin, Ph.D. CSCS
jgodin@fitchburgstate.edu
Office: 155 North Street, Room #111; Extension 3716
Teaches: Exercise Physiology I; Exercise Physiology II; Exercise Testing and Prescription; Fitness Management; Functional Anatomy; Scientific Foundations of Strength Training & Conditioning; Nutrition in Exercise and Sport; Health Promotion; Exercise, Nutrition and Heart Disease; Health and Fitness

David Heikkinen, Ph.D.
dheikkin@fitchburgstate.edu
Office: 155 North Street Room #109; Extension 3922
Teaches: Fitness Management; Biomechanics of Sport; Functional Anatomy; Human Motor Development; Health and Fitness

Timothy Hilliard, Ph.D. CSCS
thilliar@fitchburgstate.edu
Office: 155 North Street Room #108; Extension 3671
Teaches: Biomechanics & Motor Control of Human Movement; Scientific Foundations of Strength Training & Conditioning; Intro to Exercise Science; Intro to Research in Exercise Science; Functional Anatomy; Health and Fitness

Lindsay Parisi, Ph.D.
llaamann@fitchburgstate.edu
Office: 155 North Street Room #110; Extension 3158
Teaches: Biomechanics of Sport; Exercise Physiology I; Exercise Physiology II; Human Motor Development; Health and Fitness
Monica Maldari, Ed.D., M.S., M.S., CES, RCEP, EIM
mmaldar1@fitchburgstate.edu
Office: 155 North Street   Room #103;  Extension 4483
Teaches:  Professional and Career Development; Exercise Response and Adaptations in Special Populations; Intro to Exercise Science; Cardiovascular and Electrophysiology; Health and Fitness

Jason Talanian, Ph.D.
jtaliana@fitchburgstate.edu
Office: 155 North Street, Room #112; Extension 3396
Teaches: Exercise Physiology I; Exercise Physiology II, Exercise Testing & Prescription; Human Motor Development; Scientific Foundations of Strength Training & Conditioning; Professional and Career Development; Health and Fitness; Exercise, Nutrition and Heart Disease; MPTC Applied Concepts in Fitness for Police Officers

Secretary

Cheryl Sarasin
Office: 155 North Street, Room #100; Extension 3304
csaras1@fitchburgstate.edu
Hours: Monday thru Friday: 8:00 – 4:30 p.m.
EXERCISE SCIENCE CAREER OPPORTUNITIES

Career opportunities are numerous and varied for all Exercise and Sports Science graduates in both tracks – Clinical Exercise Physiology or Fitness Management. You may elect to work in an entry-level position immediately upon graduation, or you may choose to further their education. The Exercise and Sport Science major prepares you for either option.

As the Health Club industry continues to grow and be profitable, numerous opportunities exist for qualified students to obtain employment as fitness club workers. Although health club memberships span all age groups, senior citizens represent the fastest growing cohort in new membership applications. Fitness instructors in this setting will be working increasingly with an at-risk population. Appropriate education is essential; employers are already seeking those who have the knowledge base to work with this group.

Additionally, the role of the clinical exercise physiologist will continue to expand, as chronic diseases such as cardiovascular disease and diabetes continue to be pervasive. It is already impossible to rehabilitate these individuals with such conditions using supervised medical programs alone. More stable patients - those at low to moderate risk for a first or second myocardial infarction (heart attack) - are joining health clubs. Because of this trend, fitness centers/health clubs will need specially trained employees to provide the acceptable standard of care. The clinical exercise physiologist will be the “point person” for risk stratification and exercise programming for these clients, often in conjunction with physician recommendation.

Health and fitness professionals currently are not licensed however, over the past several years, a handful of states (including Massachusetts) have put forth efforts to establish licensure for Clinical Exercise Physiologists. This reflects the consistent consensus that educated, certified, and experienced health and fitness professionals are required to effectively and safely prescribe exercise to various populations (ACSM’s Health & Fitness Journal, Nov/Dec 2011). As such, the field of exercise science has been continuously growing to meet the increased demand for educated, certified, and experienced fitness professionals. The U.S. Department of Labor Bureau of Labor Statistics states that jobs for fitness workers are expected to increase 29% over the 2008-2018 decade. This increase is much faster than the average increase of 7-13% for most professions (http://www.bls.gov/oco/ocos296.htm#outlook, accessed January 14, 2011). A baccalaureate degree in exercise science with associated certification would strongly position a graduate for a career in the fitness field.

Most patients can benefit from supervised physical activity. Whether a fitness evaluation, a clinical or functional capacity test, or interpretation and exercise prescription, the exercise specialist is qualified to provide these services. Physical activity is not only preventive of over 26 diseases and conditions, it also is recognized as viable treatment for a significant number of disorders. Exercise specialists are best suited for this work, and are fast becoming formally recognized as an integral part of the health care team. Recently, ACSM has spearheaded the “Exercise is Medicine” initiative. This initiative creates a new way to view the association between physical activity and health and seeks to establish formal working relationships between medical practitioners and health fitness professionals.
Because of the shift to alternative care, and because of the interest the elderly show in acquiring and maintaining as much quality of life as is possible, there will be a growing employment market for the clinical exercise physiologist, and for those who have expertise in the management of fitness/wellness facilities. The American College of Sports Medicine recognizes this trend, and a number of presentations at its regional conference addressed this observation. Fitchburg State University will be at the leading edge of the employment market because of its strong track in clinical exercise physiology and because of the purposeful blend of clinical physiology and health fitness emphases in all tracks.

The following lists include employment possibilities. Students who elect a broader program of study may opt for graduate education, or work in the commercial, corporate, or hospital-based fitness industries.

**Clinical Exercise Physiology Track**
- Cardiac Rehabilitation
- Pulmonary Rehabilitation*
- Pediatric Rehabilitation*
- Cardiopulmonary Exercise Testing
- Corporate Rehabilitation Centers
- Physical Therapy*
- Chiropractic*
- Occupational Therapy*
- Higher Education
- Fitness Industry:
  - Health/Fitness Clubs
  - Equipment Design
  - Health Laboratory Technician
  - Research in Health and Exercise*
  - Physician Assistant*
  - Hospital-based Wellness Programs
  - Spas/resorts/cruise lines

**Fitness Management Track**
- Commercial Health/Fitness Clubs
- Corporate/Employee Wellness Programs
- Fitness Equipment Marketing/Sales
- Fitness Equipment Installation
- Technological Support for Centers
- Hospital-based Wellness Programs
- Personal Trainer
- Small Business Owner
- Management Consultant
- Municipal Fitness/Recreation Programs
  - Equipment Sales
  - Resident Care Facilities
  - Spas/resorts/cruise lines
  - Fitness Equipment Design
  - Strength and Conditioning Coach

*Some career paths require a Masters or Doctoral degree. The Exercise and Sports Science program will provide students with the necessary prerequisites.*
WHAT YOU WILL LEARN

**General Knowledge and Skills**
College students need to acquire not only profession-specific skills, but they also need to acquire more generalized skills in order to navigate successfully the changing world of work. These are:

**Communication and Interpersonal Skills**
To a large measure, the success of the exercise science practitioner depends on his/her ability to communicate and relate to others effectively. These competencies include listening, interpreting, conveying information, and public speaking. Students in Exercise and Sport Science will have numerous opportunities to develop public speaking skills, including class presentations and internship presentations.

Students will also be encouraged to submit work to regional professional organizations as well as the University’s annual Undergraduate Conference on Research and Creative Practice for presentation in poster or student session formats. **All students are required to attend one professional conference during their tenure at FSU. This requirement is on the advising form, and is a graduation requirement.**

**Leadership and Teamwork Skills**
The ability to work in a team either as a member or as its leader is critical in most professional settings, including the fields of clinical exercise physiology and fitness management. Therefore, courses incorporate group projects, laboratory teams, group presentations, and case studies to develop the skills and attitudes of leadership and team building. In addition, the department will begin each year with a series of team building events and activities in order to build a strong cohort as well as to provide a viable team experience.

**Organizational Skills**
The complexity of the workplace demands strong organizational skills. These skills would be developed primarily through the experiential base that is the foundation of this curriculum. Laboratory experiences, apprenticeships, and internships develop and reinforce organization with regard to work efficiency and reporting. The capstone course, Senior Seminar in Leadership and Ethics, will require extensive writing and literature searches.

**Critical Thinking Skills**
Critical thinking skills such as analysis, synthesis, judgment, and reflection are essential components of the practitioners work. The successful outcome for many clients may depend on the practitioner’s ability to think, to communicate, to articulate, and to formulate appropriate questions. Established on a firm foundation in the liberal arts and sciences, the Exercise and Sports Science major reflects a curriculum that recognizes the importance of these traits, and emphasizes the process of systematic learning of these skills. This is fulfilled by the progressive rigor in thought and expression required as students advance in course levels.
Computer Competency

Computer competency will be developed within the department, although you may elect an introductory computer course as a free elective. Students in the Fitness Management track are required to take CIS for Business as a prerequisite for other Business Administration courses. The matrix below depicts the courses in which students will practice and gain competencies in word processing, Power Point, Excel, statistical packages, and Access.

Discipline-Specific Knowledge and Skills

Quantitative Skills: Quantitative skills such as research, testing, and interpretation of testing are the foundation of Exercise Science. Throughout departmental course work, students will learn to search the literature, develop and conduct surveys, collect physiological data, interpret data, and analyze the results of studies.
Specific Knowledge, Skills, Abilities: There is currently no licensure for health/fitness professionals; licensure for Clinical Exercise Physiologists is in the early stages. However, ACSM and the National Strength and Conditioning Association do offer certification programs in health and fitness, and in clinical exercise physiology. Furthermore, the Commission on Accreditation of Allied Health Education Programs (CAAHEP) uses the knowledge, skills, and abilities (KSAs) set by the ACSM as the foundation for accreditation of undergraduate programs in Exercise Science. While we are not convinced that seeking CAAHEP accreditation is the right path, we have based the curriculum, in large part, on the KSAs set as standards by ACSM and NSCA. These specific certifications are rapidly becoming the industry standard. Therefore, the curriculum is based, in large part, on the knowledge, skills, and abilities set as standards by these two organizations. These are:

Health/Fitness
- Functional Anatomy and Biomechanics
- Exercise Physiology
- Human Development and Aging
- Pathophysiology/Risk Factors
- Human Behavior/Psychology
- Health Appraisal and Fitness Testing
- Emergency Procedures and Safety
- Exercise Programming
- Nutrition and Weight Management
- Program Administration/Management
  - personnel
  - budget/finance
  - marketing/sales
  - operations
  - communication
  - health promotion
  - risk management
  - Interpersonal Skills

Clinical Exercise Physiology
- Metabolic Function
- Pathophysiology/Risk Factors
- Health Appraisal/Exercise Testing
- Emergency Procedures and Safety
- Exercise Programming
- Electrophysiology
- Interpersonal Skills

THE CURRICULUM

The major is both multi- and inter-disciplinary. It is multidisciplinary in that it is the integration of anatomy, physiology, physics, psychology, and learning theory to describe and explain responses and adaptations to exercise and training, and to apply that knowledge to enhance physical potential for health, for sport, and in rehabilitation. It is interdisciplinary in that it draws from Biology and Business Administration to provide a foundation in these disciplines to support exercise science applications as well as to enhance career preparedness.

There is a common core of Exercise Science courses to ensure a solid foundation in the various disciplines that comprise this multidisciplinary field of study, and to ensure the ability to
apply knowledge in a variety of practical experiences. There is an opportunity also to develop breadth and depth in the field of Exercise and Sports Science as each track has specific requirements, as well as free electives. All Exercise and Sports Science majors must complete a core of EXSS courses, including a 240 hour internship, as well a 4 or 5 liberal arts and sciences courses, depending on concentration.

**Liberal Arts and Sciences Requirements for all EXSS majors:** (15 credit hours)

Anatomy and Physiology I (BIOL 1200) – 4 credits  
Anatomy and Physiology II (BIOL 1300) – 4 credits  
Chemistry for Health Sciences (CHEM 1200) – 4 credits OR General Chemistry I (CHEM 1300) – 4 credits  
Introduction to Psychological Science (PSY 1100) – 3 credits

**Common EXSS Core:** (46 credit hours)

Introduction to Exercise Science (EXSS #1011) – 3 credits  
Functional Anatomy (EXSS #2050) – 3 credits  
Intro to Research in Exercise Science (EXSS #2065) – 3 credits  
Exercise Physiology I (EXSS #2071) – 4 credits  
Exercise Physiology II (EXSS #2072) – 4 credits  
Human Motor Development (EXSS #2500) – 3 credits  
Exercise Testing and Prescription (EXSS #3450) – 4 credits  
Sports Nutrition (EXSS #3200) or Applied Nutrition (EXSS #3000) – 3 credits  
Scientific Foundations of Strength Training and Conditioning (EXSS #3120) – 3 credits  
Biomechanics & Motor Control of Human Movement (EXSS #4005) – 4 credits  
Fitness Management (EXSS #4040) – 3 credits  
Professional & Career Development (EXSS #4200) – 3 credits  
Internship/Apprenticeship – 6 credits  
**Attendance at a Professional Conference**

**Track Requirements:**

**Clinical Exercise Physiology**

General Biology I (BIOL #1800) – 4 credits  
Cardiovascular Physiology and Electrophysiology (EXSS #4045) – 3 credits  
Exercise Response and Adaptations in Special Populations (EXSS #3600) – 3 credits

**Fitness Management Track**

Intro to CIS for Business (BSAD #1700) – 3 credits  
Microeconomics (counts in LA&S) (ECON #1200) – 3 credits  
Health Promotion (EXSS #2400) – 3 credits  
Principles of Management (BSAD #3200) – 3 credits  
Fundamentals of Marketing (BSAD #3300) – 3 credits  
Intro to Managerial Accounting (BSAD #2020) – 3 credits  
Intro to Financial Reporting (BSAD #2010) – 3 credits  
Business Law I (BSAD #3500) – 3 credits

**Electives:**

Apprenticeship, Psychology of Sport.

The following pages outline the course requirements for completion of the major, and provide a suggested four-year plan of study.
Fitness Management Track – Liberal Arts and Sciences

Arts Cluster (15 Credits)
- Writing I
- Writing II
- Literature
- Art or Music
- Elective

Science, Math, Technology Cluster (12 Credits)
- Math: Introduction to Functions (MATH #1250)
- Lab Science: Chemistry for Health Sciences (CHEM #1200)
- Elective
- Elective

Citizenship & the World Cluster (9 Credits)
- History
- Human Behavior: Intro to Psychological Science (PSY #1100)
- Elective: Microeconomics (ECON #1200)

Global Diversity (No Credits): (2 courses from above with designation)
- Course 1
- Course 2

Additional LA&S Requirement (12 Credit Requirement) Select One Option
- **Option I:** 2 language courses plus 2 electives from any LA&S discipline
  - Foreign Language (6 cr.)

  Two courses at or above 2000 level, any discipline (6 cr.)

- **Option II:** 12 credits in same LA&S discipline, 6 of which must be at or above 2000 level
  - Discipline Chosen
  - Restricted Elective
  - Restricted Elective
  - Restricted Elective
  - Restricted Elective

- **Option III:** Individual Program, 12 credits
  - Individual Program (must have a purpose)
  - Course 1: Anatomy & Physiology I (BIOL #1200)
  - Course 2: Anatomy & Physiology II (BIOL #1300)
  - Course 3
  - Course 4

Course 1
Course 2
Course 3
Course 4
EXSS Major Requirements and Prerequisites for Fitness Management Track

Core Requirements (46 Credits)
- Intro to Exercise Science (EXSS #1011) - 3 credits
- Functional Anatomy (EXSS #2050) – 3 credits
- Intro to Research in Exercise Science (EXSS # 2065) – 3 credits
- Exercise Physiology I (EXSS # 2071) – 4 credits
- Exercise Physiology II (EXSS # 2072) – 4 credits
- Sports Nutrition (EXSS #2300) – 3 credits OR Applied Nutrition (EXSS #3000) – 3 credits
- Exercise Testing and Prescription (EXSS #3450) – 4 credits
- Scientific Foundations of Strength Training & Conditioning (EXSS #3120) – 3 credits
- Biomechanics & Motor Control of Human Movement (EXSS #4005) – 4 credits
- Professional & Career Development (EXSS #4200) – 3 credits
- Fitness Management (EXSS #4040) – 3 credits
- Human Motor Development (EXSS #2500) – 3 credits
- Internship (EXSS #4900) – 6 credits

Track Requirements (24 Credits)
- Health Promotion (EXSS #2400) - 3 credits
- Intro to CIS for Business (BSAD#1700) – 3 credits
- Principles of Management (BSAD #3200)- 3 credits
- Fundamentals of Marketing (BSAD #3300)- 3 credits
- Intro to Financial Reporting (BSAD#2010) – 3 credits
- Microeconomics (counts in LA&S) (ECON#1200) – 3 credits
- Intro to Managerial Accounting (BSAD#2020) – 3 credits
- Business Law I (BSAD#3500) – 3 credits

- LA&S requirements and Free Electives to Meet a Minimum of 120 Credits

Departmental Requirements
- Conference Attendance- students must submit paper demonstrating attendance at conference
- CPR Certified- students must have current First Aid/CPR certification

Readiness: (Institution credit only; does not count toward graduation credits)

Mathematics
- Level I: Placement Exam ( ) or Basic Math I ( )
- Level II: Placement Exam ( ) or Basic Math II ( )

English
- Placement Exam ( ) or Basic College Writing ( )

**Total Credits:** 120
PROFESSIONAL CONFERENCES

All students must attend one professional conference prior to graduation. This requirement will only be considered fulfilled if the student attends the conference and its seminar for a full day. Students who choose not to stay for the duration of the conference will not receive credit. To receive credit the student must submit a four-page paper that summarizes the conference seminar they attended and write about their overall conference experience. The department frequently posts approved conferences on the Student Information/Announcement Bulletin Board. Attendance to conferences other than those posted is possible but need to receive approval by your Academic Advisor beforehand.

APPRENTICESHIPS

Apprenticeships are 1, 2, or 3 credit mentoring opportunities with specific professors. They are designed to enhance theory through work in a specific area, such as exercise testing, strength training, fitness management, personal training, and research skills.

A variety of Apprenticeships will be advertised on the Exercise Science Bulletin Board. If you are interested in these opportunities, you should apply to the faculty sponsor in the semester prior to the semester in which the work will be done. You must be a junior or senior to participate in an Apprenticeship.

Objectives and Learning Outcomes
Specific learning outcomes will vary according to the apprenticeship experience designed, and the learning contract signed.

In all Apprenticeships students will:

- develop working relationships with professionals in the field
- apply academic learning in a work setting
- learn new job-specific skills and organizational knowledge
- perform duties, projects, and/or services that meet organizational needs
- develop work habits and attitudes needed as a professional
- gain greater awareness of personal strengths

Method of Assessment
- Mentor evaluation of the degree of competence displayed in the work done.
- Reflective paper on the experience and the knowledge and skills gained.
**Grading Procedure**
Mentor evaluation of work performance 75%
Paper 25%

**Required Readings**
Vary according to the apprenticeship experience. Readings will be part of the learning contract

**Apprenticeship Requirement**
Hours required: 45 hours per credit

**Time Sheets**
A time sheet is a record of the apprentice’s hours and tasks. Each sheet *must* be signed by the Mentor.

**Learning Contract**
This is a document that describes specifically the apprentice’s role, responsibilities, learning goals, and objectives (academic skills, personal development skills, professional development skills) for the term. The student’s input is included in the final contract which both student and mentor will sign. This document is used to check progress throughout the semester.

**Reflective Paper**
This written assignment will be a letter to your colleagues at Fitchburg State University. It will cover the following topics:

- What you have accomplished and what you have learned (skills and knowledge) from the Apprenticeship.
- Whether you have fulfilled the goals outlined in the Apprenticeship Learning Contract (or how/why they have changed.)
- Obstacles faced and methods you developed for overcoming them and what you learned in the process.
- Any other reflections on the apprenticeship experience you want your colleagues to know.

**STUDENT ROLE AND RESPONSIBILITIES**

The student contracts to serve in a paraprofessional capacity. The student is ultimately responsible for insuring the experience fulfills all the learning goals and course requirements:

1. Fulfillment of the required hours
2. Evaluations by the mentor
3. Formal Learning Contract
4. Time sheets
5. All written assignments
MENTOR ROLE AND RESPONSIBILITIES

The Mentor directly supervises the Apprentice and trains the student in the work duties, overseeing the daily work. He/she supports the student’s learning goals and provides valuable feedback and insights. Specific responsibilities include:

1. Provide thorough orientation to the organization and job role training
2. Discuss and sign formal Learning Contract
3. Provide on-going and constructive feedback
4. Support apprentice’s achieving the goals in the Learning Contract
5. Complete written mid-term and final evaluation forms for the apprentice, and hold evaluation discussions

Internship Program

EXSS students have completed their internships at a number of sites. Among these are: Tufts Medical Center (Pediatric Echocardiology) in Boston, Department of Emergency Medicine at Heywood Hospital, Wachusett Dirt Dawgs, CrossFit EXP, the Cardiac Rehabilitation Facility at Emerson Hospital, Department of Pulmonary Medicine at HealthAlliance Hospital, Exercise Physiology lab at Children’s Hospital in Boston, Caveny Chiropractic Neurology, Winchester Hospital Chiropractic Center, Joslin Diabetes Clinic, Camp Shane in Ferndale New York, USARIEM (United States Army Research Institute of Environmental Medicine), Women’s Professional Softball (Riptide), U-Mass Lowell Sports Performance, USA Triathlon National Training Center, Mike Boyle’s Strength & Conditioning, Pfizer Corporate Wellness Center, Global Fitness, Orchard Hills Fitness Club, Verizon Health & Wellness Center, Assumption College Athletic Department, Cushing Academy (hockey team), Gardner Public Schools (track and field teams), St. John’s Prep School (track team), College of the Holy Cross Athletic Department, Harvard University Athletic Department, Ramsey Rehab, Townsend Public Schools (education), Walt Disney World, FSU Athletic Training Room, FSU athletic teams, FSU Recreation and Athletic Departments. These are just a few of the site and additional sites are continually being developed.

I. Overview of the Internship Program

The internship program in the EXSS department is an experiential education program. The student intern contracts with an organization to provide specific outcomes/services that meet the students’ learning objectives as well as the needs of the organization.

Using the actual work as the foundation, the students actively engage in their own educational and professional growth through conscious reflection and analysis. They grow by relating to
professionals in the field, practicing what they have been learning conceptually, striving for high (but attainable) expectations, and systematically reflecting on their experiences.

**To be eligible to participate in an internship, students must have an overall and EXSS GPA of 2.5 or greater, hold a current, valid CPR certification, have turned in your professional conference attendance paper, and have completed EXSS #3450 Exercise Testing and Prescription. Additionally, students doing an internship in a clinical setting must have completed EXSS #4045 Cardiovascular and Electrophysiology and EXSS #3600 Exercise Response and Adaptations in Special Populations.**

**Note:** Students planning to complete their internships at most clinical sites will need to complete additional requirements, including several vaccinations, a CORI check, and an online orientation. Please plan accordingly, as these additional requirements will require extra time and must be completed before you can register for your internship.

**Definitions:**

**Internship Site Supervisor:** This is the person you will report to while at your internship site and oversee your internship experience while there. They will complete your Mid-Term Internship Evaluation and your Final Internship Evaluation.

**FSU Internship Coordinator:** This is an EXSS faculty member at FSU who will oversee the overall internship program for the EXSS Department. This faculty member will conduct the mandatory pre-internship meeting and collect learning objectives (via e-mail) from all students who will be interning during the fall or spring semesters (for students who are doing summer internships, please see “Academic Advisor” below). After the Internship Coordinator collects learning objectives from students who are doing fall/spring internships, the Internship Coordinator will assign you to an EXSS Department faculty member who will serve as your Internship Supervisor and oversee the remainder of your internship progress – see “Internship Supervisor” below.

**FSU Internship Supervisor:** This is a faculty member in the EXSS Department whose internship section you will be assigned to in (Web 4/Blackboard) if you are interning in the fall or spring. This faculty member will also be grading your internship assignments and oversee your internship progress. The Internship Coordinator (see above) will notify you via email with the name of the faculty member who has been assigned as your Internship Supervisor. If you are doing a summer internship – see “Academic Advisor” below.

**Academic Advisor:** This is your EXSS Academic Advisor that you meet with in the fall and spring for academic advising. For students doing an internship during Summer I or Summer II, instead of emailing your draft learning objectives to the Internship Coordinator, you will e-mail the draft learning objectives directly to your Academic Advisor. You will be assigned to your Academic Advisor’s internship section in Web 4/Blackboard, they will grade your internship assignments, and oversee your internship progress.

**II. Program Objectives**

In the Internship Program, students will:

- Develop working relationships with professionals in the field
- Observe the organization’s functions and roles in action
Apply academic learning in a work setting
Learn new job-specific skills and organizational knowledge
Perform duties, projects, and/or services that meet organizational needs
Develop work habits and attitudes needed as a professional
Gain greater awareness of personal strengths, interests and career/educational goals

III. Requirements

Credits/Hours: The Internship is 6 credits and a total of 240 hours at the internship site. It is possible to do 120 hours (3 credits) at one site and then an additional 120 hours (3 credits) at another site.

Required Internship Meetings:
There are two mandatory meetings required for the internship:

- The first is an informational internship meeting. There is one meeting during the fall semester for those students who plan on doing their internship in the spring, and there is a meeting during the spring semester for those students who plan on doing their internship over the summer or during the fall semester.

- The second meeting will be for your final internship presentation. Final internship presentation meetings are held three times a year in September, January, and in May.

Assignments:

- Learning Objectives
- Weekly Journals
- Time sheets
- Informational Interview
- Reflective paper
- Mid-Term and Final Internship Evaluations
- Final Internship Presentation

Description of Assignments:

These are general descriptions. You may be given more specific requirements for each of these assignments in the syllabus once you are registered for the internship course.

Learning Objectives:
The Learning Objectives is a typed document that describes specifically the intern’s role, responsibilities, learning goals, and objectives (academic, personal development, career development, and professional development skills) for the internship. This document is used to check the intern’s progress throughout the semester. You should refer to the Learning Objective Guidelines included in this document to write your learning objectives.

Weekly Journal:
The journal is a collection of daily notes of your observations, reflective thoughts, questions and feelings about your internship experience. A critical incident journal is a technique that helps
monitor and evaluate the internship experience in relation to the specific goals and learning objectives you set for the experience.

The Weekly Journal will be made up of two individual parts:
- Daily Journal Entries
- Weekly Summary

**Daily Journal Entries:** For every day of the week that you attend your internship you should write a 1 or 2 paragraph reflection about your activities for that day. This reflection does not need to include every detail of your day, but should instead focus on what you learned that day. What you have learned and taken away from the day is the most important part.

**Weekly Summary:** The weekly journal is a summary of what you did that week that helped you to progress in attaining your learning objectives. Please review your learning objectives and write about which objective that you learned the most about for the week. You should also write about learning objectives that you have not improved on that week, or improved to a lesser extent, and discuss strategies for how you will move forward with completing those objectives in your remaining internship hours. The weekly summary should be between 1 and 2 double spaced pages (this does not include the daily journal entries).

*Weekly submission guidelines will be outlined in the course syllabus.*

**Time Sheets:**
A time sheet is a record of the intern’s hours and tasks at the internship site. Each sheet *must* be signed by the intern’s Internship Site Supervisor. Your time sheets are submitted to your FSU Internship Supervisor at the end of your internship, on the day you present your final internship presentation. Time sheets are created by the student and can be in the form of a table where date and # of hours are recorded, or a calendar where # of hours are recorded for each day.

**Informational Interview/Professional Interview:**
Locate one professional in your chosen career field. (NOTE: You may *not* interview your supervisor, friends, or relatives for this assignment.) Contact and set up an informational interview with this individual. This process takes time, so start early.

**Focus on:**
- How did this person decide on his/her career?
- How did this professional get to their present position?
- What is a typical day like?
- What advice would he/she give to people entering this field?
- What skills does he/she look for on a resume when an entry-level position is filled?

In your written report of the interview, include: exact name, title, and phone number, why you selected this person for the interview, the list of questions asked and a summary of the answers you received. Draw a general conclusion about the career path discussed: Did the interview help you decide/solidify whether you would like to enter that field? What would your job description likely be if you entered the field? Are there any additional qualifications you need in order to begin working in this field?
**Reflective Paper:**
This written assignment will be a letter to your colleagues at Fitchburg State University and will cover the following topics:

- What you have accomplished and what you have learned (skills and knowledge) from the Internship experience.
- Whether you have fulfilled the goals you outlined in your Learning Objectives (or how/why they have changed.)
- Obstacles faced and methods you developed for overcoming them and what you learned in the process.
- Observations about your professional field and organizations (challenges, opportunities, issues)
- How your definition of “professionalism” may have changed.
- What your future educational and career plans are
- Any other reflections on the internship experience you want your colleagues to know

**Mid-Term and Final Internship Evaluations**
Please have your Internship Site Supervisor do your mid-term evaluation after you have completed ~ 120 hours of your internship and the final evaluation upon completion of your 240 hours. You will turn in these evaluations on the day of your final internship presentation.

**Final Internship Presentation:**
This is a **10 minute presentation** of the work done, and the things accomplished. The reflective paper may serve as a basis for this talk. Use of multimedia enhancements to this talk, such as PowerPoint or video, is encouraged. This is a **professional presentation**. **Your demeanor should be formal as should be your dress.** See the Final Internship Presentation Guidelines.

**IV. Student Role and Responsibilities**
The student intern is primarily responsible for developing the internship and gaining approval for the internship from the FSU Internship Coordinator and Internship Site Supervisor. The student contracts with the organization to serve in a paraprofessional or professional capacity during the semester. The student is ultimately responsible for ensuring the experience fulfills all the learning goals and course requirements:

1. Attendance at both mandatory Internship Meetings (Informational meeting before the student begins the internship and the meeting for your Final Internship Presentation)
2. Typed Learning Objectives document (Objectives are drafted then discussed/reviewed with FSU Internship Coordinator/Academic Advisor first, and then by their Internship Site Supervisor, prior to final approval).
3. Learning Objectives Form and Contractual agreement form signed by the Internship Site Supervisor and submitted along with the Special Studies Form to the FSU Internship Coordinator/Academic Advisor by deadline. Special Studies form serves as a signed “red card” to register the student for the Internship course.
4. Submission of weekly Journals.
5. Fulfillment of the required hours at the site to meet credit criteria (*signed time sheets will be the documentation*).
6. Evaluations by the Site Supervisor (mid-term evaluation AND final evaluation).
7. Informational Interview
8. Reflective Paper
9. Time sheets (to be turned in to faculty advisor at the time of student’s Final Internship Presentation).
10. Final Internship Presentation

V. Internship Site Supervisor Role and Responsibilities

The Internship Site Supervisor, who directly supervises the student intern, plays a dual role. As the staff supervisor, he/she trains the student in the work duties and oversees the daily work. As an educational mentor for the student intern, he/she supports the student’s learning goals and provides valuable feedback and insights. Specific responsibilities include:

1. Provide thorough orientation to the organization and job role training
2. Discuss and sign formal Learning Objectives document
3. Review and sign Fitchburg State University Contractual Agreement
4. Review and sign weekly time sheets
5. Provide on-going and constructive feedback
6. Provide appropriate opportunities to learn about the work unit, organization, and profession
7. Support the intern achieving his/her goals in the Learning Objectives
8. Be available to discuss topics and issues for selected written assignments
9. Complete written mid-term and final evaluation forms for the intern, and hold evaluation discussions

VI. FSU Internship Supervisor Role and Responsibilities

The FSU Internship Supervisor for the internship serves as a resource to the student during the placement process, grades all written assignments, and monitor’s the student’s progress throughout the internship. In addition, he/she serves as the University’s liaison between the organization (site supervisor), student intern, and Fitchburg State University. Responsibilities include:

1. Orient the site supervisor to FSU requirements and quality expectations
2. Grade and record all assignments
3. Be available to support the site supervisor on matters related to the internship
4. Be available to advise student interns on any program-related or work-related issues as needed
5. Contacting the site supervisor (in person or by phone) during the time of the internship
6. Submits final grade for semester

VII. Grading

*Grading is outlined in the course syllabus.*
Fitchburg State University  
Exercise and Sports Science Department  
INTERNSHIP LEARNING OBJECTIVES

Student Intern Name ___________________________ Internship Site _________________________________

Site address ________________________________________________________________________________

Beginning: ___________________ Ending: _______________________________

Compensation ______________________________ (if none, report $0)

To Intern:  
Is there anything that would prevent you from carrying out the assigned duties?  
If so, please make all parties aware at this time.

Job description  
Obtain a job description from the internship site.  
Please attach a copy of the job description to this form, along with your final, revised learning objectives.

Learning Objectives:  Describe what your learning objectives will be.

I.  
Academic  
Learning Objectives  Tasks and Strategies  
What I want to learn  How I am going to learn it?

II.  Professional Development  
Learning Objectives  Tasks and Strategies  
What I want to learn  How I am going to learn it?

III.  Personal Development  
Learning Objectives  Tasks and Strategies  
What I want to learn  How I am going to learn it?

IV.  Job Hunting Goals  
Learning Objectives  Tasks and Strategies  
What I want to learn  How I am going to learn it?

You are encouraged to meet with each other periodically as you are out on your internship in order to discuss experiences informally, and glean suggestions and ideas from your colleagues.

Site Supervisor Signature:____________________________________________________________________

FSU Internship Supervisor Signature: ____________________________________________________________
ACADEMIC ADVISING

Each of you will be assigned an academic advisor who will work with you to ensure that you are progressing through the program. Advisors will meet with you on a regular basis to provide academic and career counseling, to help hone your presentation skills, and to assist you in building your portfolios. Of course, you do not have to wait for your advisor to contact you — each faculty member holds regularly scheduled office hours, and are always willing to meet at other times as needed. Take advantage of the faculty as a resource!

Course Scheduling

Each advisor posts a list of times for you to sign up for academic advising. This guarantees you ample time to discuss your course selections and your academic progress. Course scheduling occurs twice a year during October and March. During the registration period in April, you will also sign up for summer session courses, if you wish to take them.

Portfolio Development

During your junior year, you will take a course in Professional and Career Development, where you will develop a Portfolio of your accomplishments achieved throughout your tenure at Fitchburg State University. This portfolio will be evaluated and graded by your class instructor. The portfolio must include, but is not limited to, the following: a cover letter, resume, list and description of courses taken, list of all exercise testing competencies, list of professional certifications, names of 2 professional references, transcripts, and a final statement of purpose for employment or graduate school application.

ACADEMIC POLICIES AND PROCEDURES

Repeating Courses after a Failing Grade

A student may repeat – once -- a course in which the assigned grade is a 0.0 or Unsatisfactory. In these cases, the new grade will be substituted for the original grade in calculating the student's cumulative GPA. The original grade, however, will continue to appear on the transcript. A transfer grade of 2.0 or better eliminates the original failing grade in calculating the cumulative GPA. Because grades from transfer courses are not transferable, the new grade itself is not calculated into the cumulative average.
Repeating Courses after a Passing Grade or Audit

A student may repeat -- once -- any Fitchburg State University course for which a 1.0, 1.5, or AU is earned. Courses must be taken at Fitchburg State University and, if at all possible, should be taken within the following year. Students may petition the dean of Student & Academic Life to repeat courses at other colleges. The repeated course will be indicated as such on the student's transcript.

Good Academic Standing for EXSS majors

To achieve good academic standing, students must:
- Maintain an overall cumulative GPA of 2.0 or higher in all college courses;
- Maintain a cumulative GPA of 2.5 or higher in EXSS courses

Minimum Grade Requirement for EXSS Courses

In addition to the departmental 2.50 GPA requirement, the following courses carry a prerequisite minimum grade of 2.0 in (EXSS 1011) Intro to Exercise Science and (BIOL 1200) Anatomy and Physiology I in order to move forward in the major and register for the courses listed below:

- EXSS 2050 Functional Anatomy
- EXSS 2065 Introduction to Research in Exercise Science
- EXSS 2071 Exercise Physiology I
- EXSS 2300 Sports Nutrition
- EXSS 2400 Health Promotion
- EXSS 3000 Applied Nutrition
- EXSS 4040 Fitness Management
- EXSS 4200 Professional and Career Development

Students who do not meet the 2.0 minimum grade requirement in EXSS 1011 and/or BIOL 1200 will only be allowed to re-take these courses once in order to achieve the grade requirement.

Early Intervention for Academic Difficulties

Any student failing to maintain good academic standing in a given semester will be required to meet with their advisor.

College Probation

If a student's cumulative GPA falls below 2.0 at the end of any semester that student will be placed on college probation. To avoid suspension, the student must meet the following criteria:
• A student on probation who has attempted fewer than 33 semester hours and who has maintained a cumulative GPA of 1.6 or higher may enroll for a third semester to improve academic standing.

• A student on probation who has attempted 33 to 59 semester hours and who has maintained a cumulative GPA of 1.8 or higher for four semesters may enroll for a fifth semester to improve academic standing.

**Departmental Probation**

If a student's cumulative GPA in the major falls below 2.5 at the end of any semester that student will be placed on departmental probation and given one semester to bring his/her GPA up to 2.5 or better. Failure to do so will result in removal from the EXSS major, with the following two exceptions:

• A student on probation who has attempted fewer than 33 semester hours and who has maintained a cumulative GPA of 2.1 or higher in major courses may enroll for a third semester to improve academic standing.

• A student on probation who has attempted 33 to 59 semester hours and who has maintained a cumulative GPA of 2.3 or higher in major courses may enroll for a fifth semester to improve academic standing.

**Students on probation must:**

• Meet with their academic advisor before the start of the second week of each semester to review current course load and arrange periodic meetings throughout the semester.

• Utilize the many resources the university offers, including faculty, Counseling Services, Academic Success Centers, Expanding Horizons, Career Services, and other support systems, as needed.

Students not making satisfactory progress in completing the academic requirements of the major for two consecutive semesters will be required to leave the EXSS major.

A student may be on academic probation in the EXSS major only once. Students who return to good academic standing after being on probation must maintain an EXSS GPA of 2.5 or higher; falling below a GPA of 2.5 in any subsequent semester will result in automatic removal from the major.

**Appeal Process**

Any student required to leave the EXSS major due to deficient academic progress may appeal to the EXSS Student Affairs Committee, who deal with issues of academic standing. The student will be allowed to present, in writing, evidence of significant extenuating circumstances. The Student Affairs Committee will take this information into consideration and issue a recommendation to the Chair of the EXSS Department within 24 hours following the hearing. The Student Affairs Committee may also make recommendations to the chair regarding plans of
action for students on academic probation. The EXSS Department Chair will notify the student within 3 days of the departmental ruling.

## Inappropriate Use of Technology in the Classroom

1. The Exercise and Sports Science Department has established the following policy regarding inappropriate use of technology in the classroom.
   a. Definitions
      i. Technology includes cell phones, laptop computers, computer tablets, Ipads, portable recording or listening devices.
      ii. Inappropriate use includes the use of devices for personal entertainment, communication with people outside the classroom, or for use other than class related purposes.
   b. Policy
      i. It is at the discretion of the course instructor to ask a student to leave the classroom for any suspected or obvious inappropriate use of technology. If a student is a repeated offender then a formal complaint may be filed with the Dean of Student and Academic Life.

## ACADEMIC AWARDS

Each spring at Honors Convocation, the department gives two awards to an Exercise and Sports Science student who has demonstrated leadership in the department as well as excellent potential for success in the field.

## The Exercise and Sports Science Club

Consider joining the Exercise and Sports Science Club. Social and academic activities will be planned throughout the year under the auspices of the club.
STUDENT FEEDBACK

There are several opportunities for students to become involved in shaping their own learning opportunities. These are described below:

Exercise Science Curriculum Committee:

Faculty and student representatives will convene biannually to address such issues as course offerings, teaching needs, administrative challenges, and issues relevant to the administration of the major. An annual review of the curriculum to ensure that the skills, knowledge, and abilities needed in the profession are included throughout the course work in the depth required for professional success.

Student representatives from each track will be selected in the spring for the following year. A meeting of the majors will be held, and students will make nominations from the floor. The meeting and agenda will have been announced via flyer, email, and classes approximately 10 days prior to the meeting date. Each term of representation is two consecutive semesters; students may share the position and may serve multiple terms. Student representatives must be in good academic standing, and have no incomplete grades.

Meetings of the Major:

In accordance with departmental policies, meetings of the students and faculty must be held each semester for the following purposes: (1) updates and announcement about the major, (2) immediate concerns/issues of the students, (3) student interest in courses being offered the following semester, (4) pre-registration information for select courses (e.g. internship seminar schedule), and (5) Exercise Science Club updates.

Feedback from Students:

In addition to the Exercise Science Curriculum Committee and meetings of the major, there would be several opportunities for students to give feedback about the courses and the major. The preferred means is conversation with course instructors, the Program Coordinator, or the Department Chairperson. Another avenue is the use of a reflective feedback form, generated by the instructor. A third form of feedback would be the use of a departmental suggestion box with active responses via bulletin board. A fourth means of gathering information is an exit interview with students who choose to leave the major and/or the University to ascertain their reasons for leaving.
