# Assessment Plan for Program/Department

- I. Insert the program or department Assessment Plan
- II. Explain any changes in the assessment plan including new or revised PLOs, new assessments that the program/department plans to implement and new targets or goals set for student success.
- The number of students responding to the online survey has not produced a meaningful sample (3 responses), sowe are considering returning to administering a survey via paper.

III. If you do not have a plan, would you like help in developing one?

The historians continue to utilize the assessment data, despite the limitations of a statistically small sample. Assessment data for the Senior Seminar course, as well as outcomes in elective courses, indicate that students continue to benefit from attention to perceptive reading, critical thinking, and emphasis on grammar and fundamentals of effective communication. Utilizing assessment data, the historians reformed the one-semester course Historical Methods and replaced it with two courses, Reading Historical Landscapes and Constructing History. This did not alter students' required credit hours for the major because the additional course replaced an elective course. This curricular decision allows students to focus on reading within the discipline- including historiographical scholarship and historical evidence and critical thinking about the past separate from the intellectual activity of engaging in research, practicing methods of historical inquiry and writing within the disciplinary conventions of evidence, citation, and formatting. The curricular change was data-driven and was passed by AUC in December 2016. The faculty look forward to assessing the effectiveness of this change in the assessment cycle of 2019-2020 when the first cohort of students under the revised curriculum reach the program assessment point. The historians will consider the feasibility of extending these courses to history minors, the number of which has increased 81 percent between AY 14 and AY 16 (From 48 to 87, see Phase I Data).
