122. Comments

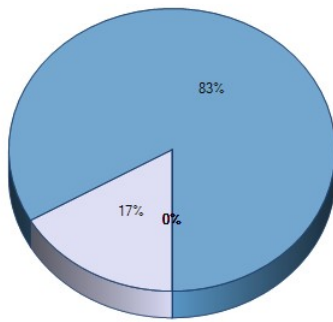

1. Industrial technology needs to take a look at the concentrations they are offering and be able to provide the courses described on the concentration description sheet. The "energy management technology" contraction was very poorly constructed, with courses that were never offered for numerous reasons, not enough students, facility/lab/equipment issues and poor department organization.
I found Fitchburg State to be a wonderful school. There were in my opinion very few teachers who i thought were outstanding and concerned with the progression of students in the class. Some teachers had a passion for the subject they were teaching while other classes just passed out packets and said, Complete this and thats it. The classes i learned the most were the ones that involved myself and the class. The classes were formatted as a discussion not a lecture. Also, my advisor wasn't very helpful. They didn't exactly sit down with me my freshman year and tell me everything i needed to know. I know some of its my responsibility but other stuff they should be telling you about. For example, Degree Evaluation, visiting career services to help find a job after or during school, or even suggesting websites to help find a job in the field you are studying. There was no push or help in that. It was just get the classes and thats it. Advisors are suppose to help you find the classes you need and also in my opinion help with finding a job if they are still interested in having a career in their field of study. That to me is what student teacher relations should be all about. Overall though, i did enjoy a lot of my classes. I learned a lot and this is just the beginning.
