AA Identified Strategic Priorities	Department initiatives in this area
Early-College Programs	
Community College Collaboration	
Community- Engaged Scholarship opportunities for faculty and students	
Workforce Development Programming	
Advisory Boards or industry partnerships	
Responsive Academic Portfolio: Accelerated online programs	
Responsive Academic Portfolio: Degree-completion programs	
Responsive Academic Portfolio: UG-Grad Pathways	
Responsive Academic Portfolio: New high-demand degree programs	
Implementation of our general education (LA&S program)	
High Impact Practices & Applied Learning: Internships	
High Impact Practices & Applied Learning: community engagement coursework	
High Impact Practices & Applied Learning: undergraduate research	
High Impact Practices & Applied Learning: International Education	
Inclusive Excellence: inclusive teaching,	
Inclusive Excellence: ensuring diversity in the curriculum	
Improved department Advising & Mentoring	
Coordinated Student Success department interventions	
Co-Curricular Experiences (Residential Learning Initiatives,)	
Student Ready Practices & Policies: Improved course scheduling, transfer friendly practices,	
Student Success Definition	

All-Campus Educators	
Open Educational Resources	
Integrated Career Services	
Strengthened Civic Engagement opportunities through courses and programs	
Registrar Department Specific Strategic Priorities from Program Reviews, Assessment Lessons and DEI plans	
Training a new Registrar	This is a big initiative. It is going to take a full year and possibly beyond to get them up to speed.
Implementing new General Education	The shell of this will be up by June, but it will be a continuous project as additional courses go through governance next year.
Implementing the new General Education for Transfer Students	There was a one year delay on the new General Education curriculum for transfer students. This will need to be scribed in degree works once it is decided what their Gen Ed curriculum will look like.
Ready to pivot if COVID19 calls for social distancing	If distancing is mandated, schedule modalities will need to be changed and classrooms will need to be rescheduled.
Banner 9 SSB implementation	The new version of student self-service will be rolled out in FY22. There is much testing that needs to happen before this can take place.
EMS	There is a new version of EMS being rolled out in FY22 that will take time to test.
Parchment	Parchment has purchased Credentials and there will be a new version of the transcript web application that will be rolled out in FY22
New part time Transfer position	This position will be vital to approve in FY22 as the transcript population grows.
Veterans	Things are becoming more complicated with the enrollment certification process for our Veteran student population. New software has been rolled out and new requirements for the certification process are constant. We need to be ready to support this area. It has grown from 10% of someone's job to 30% and as the population continues to grow, this could be something the University is going to have to look at. Should a Veterans center be established with a full time person that does everything for the veteran student?

Graduation	The graduate population continues to grow each year with the accelerated programs. Graduation clearance is becoming so big, the university will need to assess whether or not we will be able to sustain the process of graduate clearance with the current staffing we have. These accelerated programs have been in place for 5 years and the staffing needs have never been reviewed
Dynamic Forms	Although we have had success with a few forms, we have a ways to go to have all of our forms up and running in dynamic forms.
Petition form	This form may need to be broken down into a variety of forms (i.e. university policy petition or department policy petition). It is too complicated in its current state to use dynamic forms.
Pre-registration	This is the 6th year that we are preregistering incoming freshmen and the 4th year we are doing full schedules. The majority of this work will take place in June.
