We are pleased to present the annual edition of this publication to honor the creative, community and scholarly work of Fitchburg State University faculty and librarians. This booklet offers an opportunity to recognize and celebrate the intellectual and creative achievements of our faculty and librarians. These activities both spring from and feed our central teaching mission. Reflected in these pages is the dedicated work of a community of scholars.

PUBLISHED MAY 2021
Status Traps
Christa Marr has long been fascinated by concepts surrounding income inequality and how factors affect mobility in families.

“My dissertation was on redistribution of wealth and income inequality, so I’ve done most of my work in that area,” said Marr, who joined the Fitchburg State faculty in 2015. Her scholarly work includes exploring variations of mobility related to parental income. “If income is persistent, what else is? Because income doesn’t tell the whole story.”

To conduct the research, Marr accessed the ongoing National Longitudinal Survey of Youth that began in 1979. The cohort, representing thousands of participants across the country, now spans generations.

“We found evidence of ‘status traps,’ particularly in income,” Marr said. “Our least mobile populations were from middle income households. We also found that there tended to be higher educational persistence for higher educational achievers, with parents who went to college tending to have children who were more likely to attend college.”

With collaborators from other institutions, in the past year Marr has published on local intergenerational mobility in the European Economic Review and presented at the Eastern Economic Association Conference. At the campus level, she shared her work at the Center for Faculty Scholarship colloquium in April.

Marr wants to dive deeper into related topics like self-esteem and parental time investment and how those factors can influence the next generation’s mobility. Preliminary findings indicate that a parent’s income plays a significant role in their child’s future income. “Your background does matter,” she said, adding that the U.S. has a higher level of income persistence than elsewhere in the Western world. She said she hopes to use her research to explore effective policy initiatives that may help facilitate a more mobile society, such as providing more opportunities to children, particularly from lower and middle income backgrounds.

Marr became interested in this field when she began her graduate studies at Clark University in 2009. “We were just getting into the Great Recession, and a lot of what I was interested in pursuing in general was economic development and income inequality in general,” she said. An adjacent interest in community development and planning led her to consider these topics in community settings.

With her current Honors students, Marr explores these issues at the local level. “My role on these big projects has included a lot of data and a lot of results analysis,” she said. “Now I’d like to see some of the people behind it.”
Elyse Clark
EARTH & GEOGRAPHIC SCIENCES

The Human Environmental Impact

Elyse Clark has always been fascinated by geology, likely inspired by the curiosity she felt exploring her mother’s rock collection. “I feel like I’ve always wanted to be in the environmental field,” Clark said. “When I was an undergraduate, I started doing research and seeing how you could be a professional in that field.”

Clark, who grew up in Virginia and completed her bachelor’s degree at the University of Mary Washington, studied metal contamination in urban lakes. “I’ve been trying to find different ways to make the connection between human and urban impacts on the natural environment,” she said.

Much of her early research in that area looked at the impact of the mining industry in the Appalachian mountains. When she came to Fitchburg State in 2018, however, she had to reorient herself. “There’s no mining up here, so I had to switch research topics,” she said.

One topic with which she quickly became familiar living in the Northeast concerned the treatment of roads in winter with salt. She similarly refocused her research to look at how water resources in the region have grown more salty over time.

In recent months, she has collaborated with undergraduate student Robert Carpenter ’22. Together, they have installed “loggers” at six sites within the Nashua River since October, with the units taking automated data at 15-minute intervals. Carpenter has also collected soil and snow samples.

The impact of salt on the waters and soils surrounding roadways is readily apparent, Clark said. “We can see the exact time that there is a pulse of salt that goes into the river,” she said. “We had a few soil samples where the salt levels are too high for our meter to measure. The soil samples are three times saltier than ocean water.”

Plants can’t grow in the salty soil, she said, and even native insects can’t survive the changes in their environment.

Carpenter was Clark’s co-presenter for their “Analysis of the Upstream to Downstream Impacts of Road De-icer Applications on Water Quality in Northern Massachusetts,” which was given at the Northeastern Section Geologic Society of America Conference in March. Clark is hopeful the two can co-present—in person—at another conference in Portland this fall.

“It’s been a rewarding experience,” Clark said of her student collaboration. “He’s the epitome of the ideal student for this kind of work.”
J.J. Sylvia, IV
COMMUNICATIONS MEDIA

Systems of Truth

J.J. Sylvia IV describes his research trajectory as the intersection of philosophy and communication, and how media shapes us as humans. Working with the Society of Philosophers in America (SOPHIA), which emphasizes the importance of public discussions about philosophy, he founded a Worcester County chapter that was the first to include student involvement. Students in his communication law and ethics course develop discussion guides and host public discussions about issues related to communication ethics.

Recent discussions looked at social media and its role in political speech and how COVID-19 has impacted our communication practices. These discussion guides are then published online and used by other SOPHIA chapters around the country. Sylvia has received feedback from students and community members that one of the benefits of these events is that it creates space for challenging and nuanced conversations between students and community members that usually aren’t available anywhere else.

This emphasis on public engagement is an important theme throughout Sylvia’s work. The larger issue is how we collectively build our systems of truth, he said, citing phenomena like “fake news” or conspiracy theories that have eroded public trust. “The challenge we’re facing now is that organizations and governments have learned how to weaponize social media,” he said. “If those kinds of views aren’t challenged, they will continue to spread.”

Sylvia’s ongoing research explores the past, present, and future of this challenge. “The Ancient Greeks dealt with similar challenges facing their democratic systems,” he said. “Western philosophy began, at least in part, as a critique of the rhetorical skills being taught by Sophists to better enable Greek citizens to participate in their burgeoning democracy.”

In the present, Sylvia believes it is important to help people better understand how often complex technologies, such as big data, impact their day-to-day lives. One approach he has adopted for this is creating interactive projects, such as his augmented reality program, Becoming Big Data. Created with student collaborators funded through a special projects grant, this project visualizes and personalizes the impact of normally invisible data streams. Looking to the future, Sylvia is working to better understand how social media and other tools can be leveraged to help strengthen our systems of truth. “Trust in our systems of truth is necessary for a healthy democracy.”

- 3D Printing and Donating Mask Buckles for Communications Media Department and local hospitals.
- Reviewer, Deleuze and Guattari Studies journal.
- Reviewer Board, Information journal.
- Reviewer Board, Future Internet journal.
- Reviewer, Mathematics journal.
- Reviewer, Social Sciences journal.
- Reviewer, Applied Sciences journal.
- Reviewer, Society of Philosophers in America discussion guides.
- Reviewer, Sustainability journal.

Teresa Fava Thomas
ECONOMICS, HISTORY, & POLITICAL SCIENCE

Scholarship

PUBLICATIONS:
- Interviewed by Umberto Mucci: “The Italian Slaves in the USA: The Padrone System” in We the Italians magazine, Rome, Italy, issue #131, September 2020.

CONFERENCE PRESENTATIONS:
- Center for Teaching and Learning/LA&S panel on “Disciplinary Ways of Knowing,” panel member on Historical Ways of Knowing, November 29, 2020.

PUBLICATIONS:

Jared Vanasse
EARTH AND GEOGRAPHIC SCIENCES

Scholarship

PUBLICATIONS:
- The paper “Effective field theory analysis of boson-trimer bond lengths to next-to-leading order” with authors Julia Qin and Jared Vanasse has recently been published in Phys. Rev. A 103, 023333 – Published 25 February 2021.
• The paper “Electric dipole moments of three-nucleon systems in the pionless effective field theory” with authors Zichao Yang (Tennessee U.), Emanuele Mereghetti (Los Alamos Natl. Lab., Theor. Div.), Lucas Platter (Tennessee U. and Oak Ridge), Matthias R. Schindler (South Carolina U.), and Jared Vanasse was submitted to the arXiv with arXiv identifier 2011.01885. This paper was submitted to Physical Review C and is currently under review for publication.

• The paper “Large-N_c and renormalization group constraints on parity-violating low-energy coefficients for three-derivative operators in pionless effective field theory” with authors Son T. Nguyen (Duke U.), Matthias R. Schindler (South Carolina U.), Roxanne P. Springer (Duke U.), Jared Vanasse was submitted to the arXiv with arXiv identifier 2012.02180. This paper was submitted to Physical Review C and is currently under review for publication.

• Invited talk at the Annual 2020 Fall Meeting of the American Physical Society Division of Nuclear Physics. The talk titled “Fundamental Symmetry Violations in Nuclear Systems” was given on October 30, 2020.

Jeff Warmouth
COMMUNICATIONS MEDIA

Creative Activity
• Urgent Blowout - new inflatable sculpture & video (2019), featured in:
  • 404 International Festival of Art & Technology, Rosario, Argentina (virtual).
  • Faculty Exhibition: Art & Communications Media, Fitchburg Art Museum, Fitchburg, MA.
  • New Work from Art & Communications Media Faculty, Fitchburg State University, Fitchburg, MA.

OTHER EXHIBITIONS, FESTIVALS & SCREENINGS:
• Revolutions Per Minute Festival, University of Massachusetts, Boston, MA.
• (com)posto, Academia Nacional de Belas-Artes, Lisbon, Portugal.
• Franchise 3, Gallery 1988, Los Angeles, CA, curated by Scott Listfield.
• RING: Annual Members’ Exhibition, Boston Sculptors Gallery, Boston, MA.
• The Window Show, Boston Cyberarts Gallery, Boston, MA.

PUBLICATIONS:
• Greg Cook, “Giant Inflated Head Stuffed with Ideas, Daily Concerns, Neuroses”, Wonderland, Jan 17, 2020, review of solo exhibition.

Amy Wehe
MATHEMATICS

Scholarship

CONFERENCE PRESENTATION:

Community Service

• Section Next Coordinator for the Northeast Section of the Mathematical Association of America (MAA).

GRANT WORK:
• Received an OER Grant from Fitchburg State University’s Open and Affordable Education Committee. The two $500 grants supported the adoption of high quality, no cost, freely accessible resources (Open Educational Resources) awarded for two courses– Math 1700 Applied Statistics and Math 4200/4250 Probability and Statistics I and II.
• Member of the implementation team of the $250,859 Davis Educational Foundation grant to map core career competencies to students’ academic work and then create an action plan easily digestible by prospective and current students as they plan their Fitchburg State University experience with their career trajectory in mind.

Daniel Welsh
BIOLOGY & CHEMISTRY

Scholarship

• Acted as a reviewer for the Biological Journal of the Linnean Society and reviewed a scientific manuscript submitted for publication to the journal.
• Organized a session of oral presentations focused on fish biology in the upcoming 2021 Northeast Natural History Conference.
• Served as a reviewer of a population Evolution textbook as the authors work on creating a new edition.

Community Service

• Served as a judge at two science fairs, the Nashoba Regional Science Fair and the Worcester Regional Science & Engineering Fair.
Hong Yu
ENGINEERING TECHNOLOGY

Scholarship

PUBLICATIONS:

CONFERENCE PRESENTER:
- Hong Yu, Cory Lo “Integrating Multiple Computerized Sensors using a Microcontroller displaying LCD”, 2020 CFS Faculty-Student Annual Grant, May 1, 2020.

AWARDS:
- Received 2020 Center for Faculty Scholarships (CFS) Faculty-Student Annual Grant at Fitchburg State University, “Integrating Multiple Computerized Sensors using a Microcontroller displaying LCD”.
- Received 2020 Center for Faculty Scholarships (CFS) Faculty-Student Annual Grant at Fitchburg State University, “Environmental Monitor System with Visual Analysis of Sensor Data”.
- Received 2020 Special Projects Grant (Major Grant) at Fitchburg State University, “Multiple Embedded Sensor System Performance Platform for Solar Decathlon”.

CONFERENCE ACTIVITY:

Creative Activity
- Guidance the proposal for the undergraduate research conference (the virtual conference) Title: “Smart robot car controlled by the voice commands”.
- Guidance the proposal for the undergraduate research conference (the virtual conference) Title: “Tracking number during the pandemic”.

JOURNAL AND CONFERENCE PUBLICATION PEER-REVIEWER:

Community Service
- Senior member, Institute of Electrical and Electronics Engineers (IEEE), USA, 2013 – Present.
- Judge, Robotic Challenge, Institute of Electrical and Electronics Engineers (IEEE), USA, Baltimore. 2013 – Present.
- Judge, FIRST LEGO League challenges, USA, 2020 – 2021.
