

PANIC AND EMERGENCY
NOTIFICATION TO UNIVERSITY POLICE

University Police 978-665-3111

INTERNAL PANIC BUTTONS

- The Schlage wireless lock has an Interior Push Button (IPB). This IPB can be located on the occupied side of the locking mechanism.
- To engage the lock, the door must be shut, then the occupant has an option of pressing the button, which after the occupant pressed the IPB once, a red light will blink three times. This will lock the door.

If locked, and alarm will be sent to UPD and an officer will respond

- To disengage the lock and put the lock back in the previous configuration either press the lock button again and a green light will blink three times or open the door from the inside.

AVAYA PANIC BUTTONS

- From the Phone's home screen, press the right button from the round menu button
- Panic should appear in the lower right hand corner
- Press the fourth right hand button to call UPD
- You will not hear the dispatcher, but they will hear you, (one-way call).
- In addition, this will send a text message to UPD and prompt an officer to respond.
