Prerequisites for registering for internship credits are explained in the course description sections of the programs in the university catalog. The process of an internship begins with qualified students applying to companies that sponsor internships. If a student is offered an internship, he/she brings to the Chair/Graduate Chair, a) this sheet with student signature, b) the special studies request form, c) the internship program contractual agreement and d) a letter from his/her immediate supervisor on company letterhead describing the duration of the internship and the nature of the job. The Chair will determine if the job is appropriate for an internship credit(s) and if so, he will then sign the paperwork and assign an Internship Advisor. Student can then register for the internship course.

**Submitting report and evaluation for credit:** To receive a credit, the student must do the following: during the last week of classes in that semester (even if the internship continues for a longer period) the student will prepare an Internship Report in the format described below and email it to his/her Internship Advisor along with the Employer’s Evaluation of Intern Student form. The Internship Advisor will assign a grade based on the supervisor’s evaluation and the student’s report. The Internship Advisor may also contact the student and/or the company supervisor during the internship to discuss the student’s progress. **The report and evaluation form MUST BE received before the final exam period for that semester.**

The internship report must include the following information in the specified order. The final report need not be more than five single-spaced pages.

1. **Student Information:** Name, ID#, email address, semester, duration of the internship and the title of the job.
2. **Supervisor Information:** Name of the supervisor, email address, phone number, company name, division/department, company’s full mailing address.
3. **Company Information:** Describe the nature of business of that company.
4. **Work Completed:** Explain the work environment. Depending on the nature of the work, it could include the operating system, programming language(s), application software, network configuration, database server, etc. Define all the terminology used in explaining the work clearly and concisely. This may span several sections. It must include problem specification (first in general terms and then in technical terms), its significance to the company, and the description of your contribution. Work with your supervisor to ensure that no company sensitive information is provided here.
5. **Skills Gained:** Explain briefly all the skills learned throughout this experience (both technical and interpersonal skills).
6. **Helpful Courses:** Indicate what courses were helpful with this internship and what other courses the university could offer that would benefit career opportunities.

I read and understood the procedures.
