Guidelines for the
Fitchburg State University Honors Thesis

Purpose of the Honors Thesis

The Honors Thesis serves three main objectives: 1) to provide you with opportunities to pursue an individually tailored area of study; 2) to provide you with a capstone experience which draws upon your previous studies in their major; and 3) to provide you with an opportunity to pursue in-depth research and/or carry through a substantive project to an appropriate point of closure.

Your honors thesis will provide you with the chance to work closely with a member of the Fitchburg State faculty to expand and explore the skills and knowledge you have gained over the course of your four years at the University. This experience will allow you to differentiate yourself from other students who merely completed coursework towards graduation and will be valuable in presenting yourself to prospective employers or graduate schools.

It is not required that you write your thesis in your major, however most students do conduct work that relates to their field.
Types of Thesis Projects

Most theses are academic work, often resembling a scaled-down master’s thesis. It should be obvious, though, that a thesis is not just another research paper. In addition to being more substantial, a thesis will thoroughly investigate the previous research on a topic, and, most importantly, it will also include your own insights and contributions to the topic, emanating from your critical engagement in the process.

Other theses take a “creative” approach resulting in a less traditional product. Students in art, music, new media, theatre, dance, or creative writing might find this more in line with their interests and aptitudes. Other theses might center on a new periodical, an invention, or something we might not even be able to imagine. In all of these cases, we ask for a written piece accompanying the thesis that contextualizes the work and describes its scholarly content.

All theses need to be contextualized. A science thesis is not just the results of an experiment; it includes how and why the experiment was conducted as it was, what research the experiment built upon, and its importance. A history thesis is not just an analysis of historical events or trends; it provides a context and framework for the analysis. In the same way, an artist’s statement, in whatever format, provides a contextualization for a creative work. This statement should serve to explain your creative work to an audience outside of your field.

Collaborative Theses

The Honors College is open to exploring options for joint thesis work by groups of Honors Students. The Honors Program accepts proposals for collaborative theses under the following conditions: if there is a strong rationale for the thesis to be collaborative; the students have the same thesis advisor; and it is clearly indicated, in writing and from the outset, who is responsible for what part(s) of the work.

Length of the Thesis Project

The length of your thesis project depends on many variables including your major or area of concentration, the particular topic your thesis addresses, and the way in which you present your completed project. In the humanities and social sciences, theses often are between 50 and 100 pages; in engineering, the sciences, and mathematics, they are often shorter (perhaps 25 - 40 pages). The explanatory paper written by a student doing a “creative” or other “non-standard” thesis may be shorter, perhaps 10 - 15 pages, though a creative fiction thesis might exceed 200 pages.
Choosing Your Topic/Advisor

Perhaps you are certain as to the topic and the focus of your thesis. In this scenario your next step is to find an advisor. Topic in hand, you might informally chat with professors with whom you have had good experiences in the past. One of them might be a good candidate, or s/he might be able to direct you to others for whom the topic might be more appropriate. This may take some time, but you will be learning in the process. Don't be afraid to knock on doors.

Alternatively, perhaps you have a particular professor in mind that you always thought would be a perfect thesis advisor. Your next step is to see if the professor has ideas that might excite your interest. If your first choice doesn't work out, there will certainly be other faculty members who have piqued your interest. Keep an open mind; enjoy your talks with these scholars.

In both cases, you will make a better impression if you first do a little research [departmental web pages are excellent for this] to learn about the faculty member's scholarly interests. Indeed, look up some recent papers s/he has written and read them — the faculty member will be flattered and you will have a better idea of what s/he does.

Your Thesis Advisor must be a faculty member at Fitchburg State University. Your choice of advisor should be based on the scholarly expertise of the potential advisor as well as the ability of the two of you to communicate and collaborate on your endeavor. The relationship must be one of mutual respect: as you rely on your advisor for support and encouragement, you must demonstrate a serious and scholarly commitment to work. Often students find that they are most comfortable working with advisors with whom they’ve already taken classes. This is also more comfortable for the advisor who has a sense of the student before embarking on the thesis. While this may require you to be somewhat flexible in choice of topic, it may turn out best for both you and your advisor. On the other hand, if you took a class with a professor and loved the experience but the project you have in mind is not related to this professor’s area or is not the type of project that this faculty member believes is worth developing, this professor would not be good choice for you. It is important for you both to share a vision of what the final product will be and that you come to an agreement about how that final product could be achieved. Regardless of any prior relationship, is crucial that both you and your advisor have a clear understanding of the expectations for your roles in the project. It is advisable that you devote at least one meeting early each semester to discuss the plan of work for the time ahead.
Registration for Thesis

Registering for thesis occurs during the Registration Period prior to the semester you will begin thesis. You will need to complete a Special Studies form that requires you to include an abstract of the proposed project. This form will need to be signed by your Academic Advisor (the faculty who gives you your alternate pin), your Supervisor for the Project (your Thesis Advisor), as well as the Chair of the Department in which the Thesis is being conducted (the Director of the Honors Program). Once the semester begins, you should be meeting with your Thesis Advisor on a regular basis (typically weekly or biweekly).

In addition to the choice of an advisor, you will be asked to choose a second reader for your project once the semester has begun. This person does not need to be a faculty member at Fitchburg State University, but should have knowledge of your thesis area.

Expectations of Thesis Students

The Honors Thesis is a six-credit project that is typically divided into two semesters of work: Honors Thesis Research (3 credits) and Honors Thesis Writing (3 credits). The workload rule for Honors Thesis Research and Honors Thesis Writing is expected to conform to the Carnegie Rule of 45 hours of work per credit earned (approximately 9 hours per week for 135 hours per semester; 270 hours for the project total).

Most students begin their theses at the start of their senior years, however some students, due to internship, student teaching, or other obligations, opt begin theses in the spring of their junior years. In rare cases, a student opts to complete the full thesis in a single semester. The difficulty with single semester theses is that there is much less opportunity for reflection on the project as one works and there is not time to change topics if one is unhappy with the direction of the work.

In addition to the research and creation of your project, you are expected to present at multiple times during the thesis process:

- At the end of the first semester of thesis, you present your research proposal/prospectus at a group meeting. Presentations are typically 20 minutes, with time available for questions following your presentation. The basic audience consists of your thesis advisor, second reader, and the Director of the Honors Program, but all Fitchburg State faculty and Honors students are invited to attend. If you are completing your thesis in a single semester then you will not give this presentation.
- You will submit an abstract to and present at the Fitchburg State University Undergraduate Research Conference held in the spring.
- You will submit an abstract to and present at the Statewide Undergraduate Research Conference that is typically held at UMass Amherst in the spring.
- At the end of the second semester of thesis, you present your completed research project at another group meeting that mirrors the meeting you had for your
proposal. You should be prepared to give a presentation of your work, as well as an analysis of your method and approach.

Additional Requirements

Most Honors theses don’t require any special permissions, however if your thesis involves human subjects, animal care, or hazardous materials, you must receive clearance from the appropriate committee or authority. You should discuss this with your advisor; often, s/he will have experience in securing the proper form of authorization.

Responsibilities of Your Advisor

It is essential that you understand the responsibilities of the thesis advisor, and equally important that you communicate these responsibilities to a prospective advisor. Occasionally, it will cause the faculty member to rethink the advisability of taking on the position. Remember that YOU are responsible for the timely and successful completion of your thesis. It is this independence and commitment that separates thesis work from normal coursework. That said, the thesis advisor agrees to: work with you to refine and focus your interests into a suitable thesis project; provide, for each semester of thesis work, a clear expectation for the thesis project, addressing benchmarks, length, assessment, and other aspects germane to work in the particular discipline; help identify an appropriate second reader; be prepared to meet with the student regularly (weekly or at least biweekly); inform the Director of the Honors Program if there appear to be indications that the thesis project is not on track for completion; read and comment on drafts of the thesis as it develops; grade the you in LEAD 4990 (Thesis Research) and LEAD 4991 (Thesis Writing); and participate in end of the semester thesis proposal and defense meetings.

Grading of Thesis Work

As experienced teachers and researchers, faculty members are accustomed to the process of working independently, but this process is a new and frequently difficult one for students, and should be regarded as one of the accomplishments of the thesis project. (Along the same lines, faculty may unconsciously underestimate how much help they give students in a regular course by the course’s very nature and direction—its careful sequence of readings, assignments, and lectures. The thesis students face the task of creating their course—for which only partial models may exist—in conjunction with their committee.)

Grading for the project is then holistic. The student’s selection of a significant subject/project to pursue; the manner in which the student pursued his/her research and dealt with obstacles or new situations (which may range from equipment failure to new experiences such as satisfying a human subjects review panel); the skills and knowledge the student gained from the project; the final paper and the presentation are all factors to be taken into consideration.
Please note that the standard is “appropriate point of closure,” rather than “point of conclusion.” The honors thesis is an undergraduate capstone experience and is not intended to be a mini-masters thesis in undergraduate guise. Please keep in mind that masters candidates write their theses after completing a number of courses on the masters level; our undergraduate students are conducting their research without the experience of this level of extended study.

Nor should the goal of the honors thesis be regarded as production of a publishable paper in the field. Although some students do in fact produce work that is publishable, this is not a requirement for successful completion of the honors thesis. (Most masters theses and many dissertations are never published or published only after extensive revision and further work). It is, however, appropriate to expect that the final paper for the project be presented in the established format for publication in the field.

Standards for Thesis

In addition to serving as the Capstone Experience for Honors students in our program, the Thesis project allows the program to assess the extent to which students are achieving the goals of the program. As such, all theses are evaluated to determine the extent to which they meet the following standards identified by the program:

- **Quality of Sources:** Thesis incorporates and makes significant use of rich sources. The thesis may refer to some general sources, but it makes very significant use of high-quality sources written for the field or subject of the thesis.
- **Quality of Research:** Theses demonstrates in-depth research in the subject matter of the thesis.
- **Quality of Written Communication:** Thesis displays mastery of writing and shall avoid significant errors in writing and grammar. The thesis uses appropriate vocabulary. The thesis makes use of a clear and logical plan of organization. The thesis uses accurate and complete citations.
- **Quality of Oral Communication:** In presenting the thesis, the student displays fluidity and confidence as a speaker. The student maintains effective eye contact with the audience. The student clearly explains the main argument of the thesis, and demonstrates a mastery of the relevant evidence and cites examples. If the student uses note cards or power points slides, the student does not simply read these aloud word-for-word.
- **Initiative:** The student displays initiative in developing and working on the thesis. The student helped to develop a vision for the project and followed through on fulfilling that vision.
- **Creativity:** The student left his/her own imprint on the thesis. The student went beyond simply reciting facts to advance his/her own conclusions or develop his/her own materials.

Some standards, based on the nature of the thesis projects, will not apply in every case. The assessment of these projects is not related to a student’s grade; it is meant entirely for program evaluation.
Writing the Thesis

Writing a thesis requires planning wisely and the commitment of sufficient time. As a three-credit course each semester, you should be devoting on the order of 9 hours per week (including meetings, research, etc.) to your thesis. Realize that you will have to do several revision/iterations with your advisor – no one writes a thesis in one draft. You should discuss the proper “audience” for your project with your advisor. Some advisors have strong feelings about this, and you should follow their recommendations unless you have compelling reasons not to. Generally, thesis projects shouldn’t be written for experts in the field nor should they be written for complete novices. Much of the format of the thesis is up to you, in consultation with your advisor. Disciplines have specific formats for research writing and for documenting sources.

Resources

*Ruth Butler Grants*
Ruth Butler Grants are awarded to full-time members of the faculty, librarians, administration, and student body of Fitchburg State University. Applications are due at the beginning of March. There is a preference for proposals involving students as partners in the scholarship/creative activity. Grants are awarded late in April of the academic year. Funds will become available in July and must be expended by June the following year. Grant awardees are responsible for a final report on their work to the University community submitted to the Grant Center.

*Writing Tutors*
Individual Writing tutoring, a service of the Tutor Center, is available for all students at Fitchburg State University.

*Honors Program Funds*
The Honors Program may have funds available for basic office supplies and copying. Please speak to the Director if you have funding needs.

*Undergraduate Dean’s Fund to Support Research and Creative Activity*
The Dean of Student Life and Academic Affairs often has funding available for student work. Awards are a maximum of $150 for an individual or $300 for a team. See the Director of the Honors Program or the Dean’s office for an application.
